All brass... protection against burn-outs

Models F 230 and F 356

Permaclean DFN Suction Line Filters

Permit free-flow filtering down to 10-15 microns

You can silver braze these filters into the line knowing they'll prevent hermetic burn-outs from contaminants. Access valve at inlet permits easy installation of gauge to show when system is clean and working within safe pressure drop limits. One-piece forged end caps and fittings eliminates danger of loosening during brazing. All brass, natural bright dip. 300 psig safe working pressure.

See your wholesaler for Superior's complete line of air conditioning and refrigeration components, or write for Catalog R-11.
